User Guide

Forcing the cutomization

Implementation

To force customization, you must set up the "force_customization" tag.

Proceed as follows in your back office:

- Go to Menu > Tags
- Click Change this list

Prices/availabilities			

Implementation

A new window with the title "Tag: force_customization" is displayed.

- In the list, select all the categories, subcategories or products for which you wish to force the customization.
- Press and hold the Ctrl key to select more than one.

The products selected are highlighted in blue.

• Click "Save".

Modifying the list of products

To modify the list of products concerned by the "force_customization" tag, proceed as follows in your back office:

- Go to Menu > Tags
- Click Change this list
- Press and hold the **Ctrl** key to deselect more than one product at a time.
- Click "Save".
